SUMMARY

MERN Stack Developer with hands-on experience in building scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing responsive user interfaces, RESTful APIs, secure authentication systems, real-time applications with Socket.IO, and **integrating LLM (Large Language Model)** APIs to build intelligent, AI-powered features. Experienced in designing clean architectures, managing databases, and building production-ready software from concept to deployment.

PROJECTS

WanderSoul AI

React.js • Node.js • Express.js • Tailwind CSS • LLM APIs

[GitHub](#) | [Live Demo](#)

- Built an AI-powered travel planner that generates personalized itineraries
- Integrated LLM APIs to generate structured travel recommendations based on user preferences.
- Developed RESTful APIs and a responsive UI for seamless AI-powered trip planning.
- Developed an AI-powered chatbot for interactive travel assistance and trip-related queries.

ChatBeez

React.js • Node.js • Express.js • MongoDB • Socket.IO • JWT

[GitHub](#) | [Live Demo](#)

- Built a real-time one-to-one chat application using Socket.IO.
- Implemented secure JWT authentication and user authorization.
- Developed instant messaging with real-time communication and MongoDB message storage.
- Built RESTful APIs for user authentication and chat management.

Muzeek

React.js • Node.js • Express.js • MongoDB • Cloudinary • JWT • Tailwind CSS

[GitHub](#) | [Live Demo](#)

- Developed a full-stack music streaming platform.
- Implemented role-based authentication with separate access for Artists and Users
- Implemented secure JWT authentication and authorization for protected routes.
- Integrated Cloudinary for uploading and managing song thumbnails.
- Enabled artists to upload and manage songs while users can browse and stream music.

EDUCATION

Bachelor of Computer Applications (BCA) | [School of Management and Science, Lucknow] | 2022–2025

Class XII | Jean Paul's High School [CBSE Board] | 2020

Class X | Jean Paul's High School,[CBSE Board] | 2018

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3.

Frontend: React.js, Tailwind CSS, DaisyUI, Responsive Web Design

Backend: Node.js, Express.js, REST API Development, Middleware, MVC Architecture

Database: MongoDB, MySQL, Mongoose

Authentication: JWT, bcrypt, Role-Based Access Control (RBAC)

Libraries & APIs: REST APIs, Axios, Socket.IO, OpenAI API, Groq AI API, Google Gemini API,

Tools & Platforms: Git, GitHub, VS Code, Postman, Cloudinary, Vercel, Render, Railways

Core Concepts: Component-Based Architecture, CRUD Operations, State Management, Role-Based Authentication, Responsive UI Design, Problem Solving, Debugging

ADDITIONAL INFORMATION

- Secured 1st Position in the College Web Development Competition.
- Participated in **Smart India Hackathon (SIH)** and collaborated on solving real-world problem statements.
- Active member of the college cultural club Abhivyakti, contributing to technical and cultural events.
- Built and deployed multiple full-stack MERN applications **independently**.
