SUMMARY

MERN Stack Developer with 1+ year of hands-on project experience building AI-powered full-stack applications using React.js, Node.js, Express.js, and MongoDB. Skilled in integrating **Generative AI and LLM APIs** (OpenAI, Groq, Google Gemini) to design intelligent features like AI-driven recommendation engines, conversational chatbots, and context-aware content generation. Experienced in building RESTful APIs, secure authentication systems, and real-time applications with **Socket.IO**, with a strong focus on architecting scalable, production-ready AI-integrated software from concept to deployment.

PROJECTS

WanderSoul AI

React.js • Node.js • Express.js • Tailwind CSS • LLM APIs GitHub | Live Demo

- Built an AI-powered travel planner that generates personalized itineraries
- Integrated LLM APIs to generate structured travel recommendations based on user preferences.
- Developed RESTful APIs and a responsive UI for seamless AI-powered trip planning.
- Developed an AI-powered chatbot for interactive travel assistance and trip-related queries.

ChatBeez

React.js • Node.js • Express.js • MongoDB • Socket.IO • JWT GitHub | Live Demo

- Built a real-time one-to-one chat application using Socket.IO.
- Implemented secure JWT authentication and user authorization.
- Developed instant messaging with real-time communication and <1s message delivery latency.
- Built RESTful APIs for user authentication and chat management and MongoDB message storage.

ChefMate AI

React.js • Node.js • Express.js • MongoDB • Gemini API • Tailwind CSS GitHub | Live Demo

- Developed an AI-powered recipe builder that generates personalized recipes based on available ingredients.
- Integrated Gemini AI to generate structured recipes with ingredients, instructions, and cooking details.
- Built RESTful APIs using Node.js and Express.js to handle recipe generation and backend communication.
- Integrated MongoDB for storing and managing application data.
- Designed a responsive and user-friendly interface using React.js and Tailwind CSS.

EDUCATION

Bachelor of Computer Applications (BCA) | School of Management and Science, Lucknow | 2022–2025
Class XII | Jean Paul's High School [CBSE Board] | 2020
Class X | Jean Paul's High School,[CBSE Board] | 2018

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, DaisyUI,GSAP (Animations),UI/UX Design, Responsive Web Design, Component-Based Architecture, State Management

Backend: Node.js, Express.js,REST API Development, Middleware, MVC Architecture

Database: MongoDB, MySQL, Mongoose

Authentication: JWT, bcrypt, Role-Based Access Control (RBAC)

Libraries & APIs: REST APIs, Axios, Socket.IO,OpenAI API, Groq AI API,Google Gemini API

Tools & Platforms: Git, GitHub, VS Code, Postman, Figma, Canva, Cloudinary, Vercel, Render,Railway

Core Concepts: Component-Based Architecture, CRUD Operations, State Management, Role-Based Authentication, Responsive UI Design, Problem Solving, Debugging

ADDITIONAL INFORMATION

- Secured 1st Position in the College Web Development Competition.
- Participated in **Smart India Hackathon (SIH)** and collaborated on solving real-world problem statements.
- Active member of the college cultural club Abhivyakti, contributing to technical and cultural events.
- Built and deployed 6+ full-stack MERN applications **independently**.
